SELLING POINT

Curved design

The curvature of the chair back is designed with circular curvature, which is clean and neat and more in line with modern aesthetics.

1

Tilting backrest

The backrest has a 15° tilt angle, which can be adapted to people of different body shapes. The backrest can be adjusted at multiple angles to suit your different postures at work.

2

Sliding armrest

Similar to 2D armrest sliding function of the mesh chair, sliding armrest makes it easy to adjust.

3

SELLING POINT

Folding function

Seat cushion can be turned over, easy for nesting and space-saving

4

High density foam

Californian fireproof high-density molded foam with strong resilience.

5

Assmeble packing

The packaging method has been optimized by the design team and can be used immediately after unpacking, saving space and obtaining greater profits

6

Patented product

Our company has the strength to independently develop patented products, has an excellent reputation in the market, and its quality has been certified by the market.

PATENTED PRODUCT

| PRODUCT FUNCTION

Tilting backrest

The backrest has a 15° tilt angle, which can be adapted to people of different body shapes. The backrest can be adjusted at multiple angles to suit your different postures at work.

01

Sliding armrest

Similar to 2D armrest sliding function of the mesh chair, sliding armrest makes it easy to adjust.

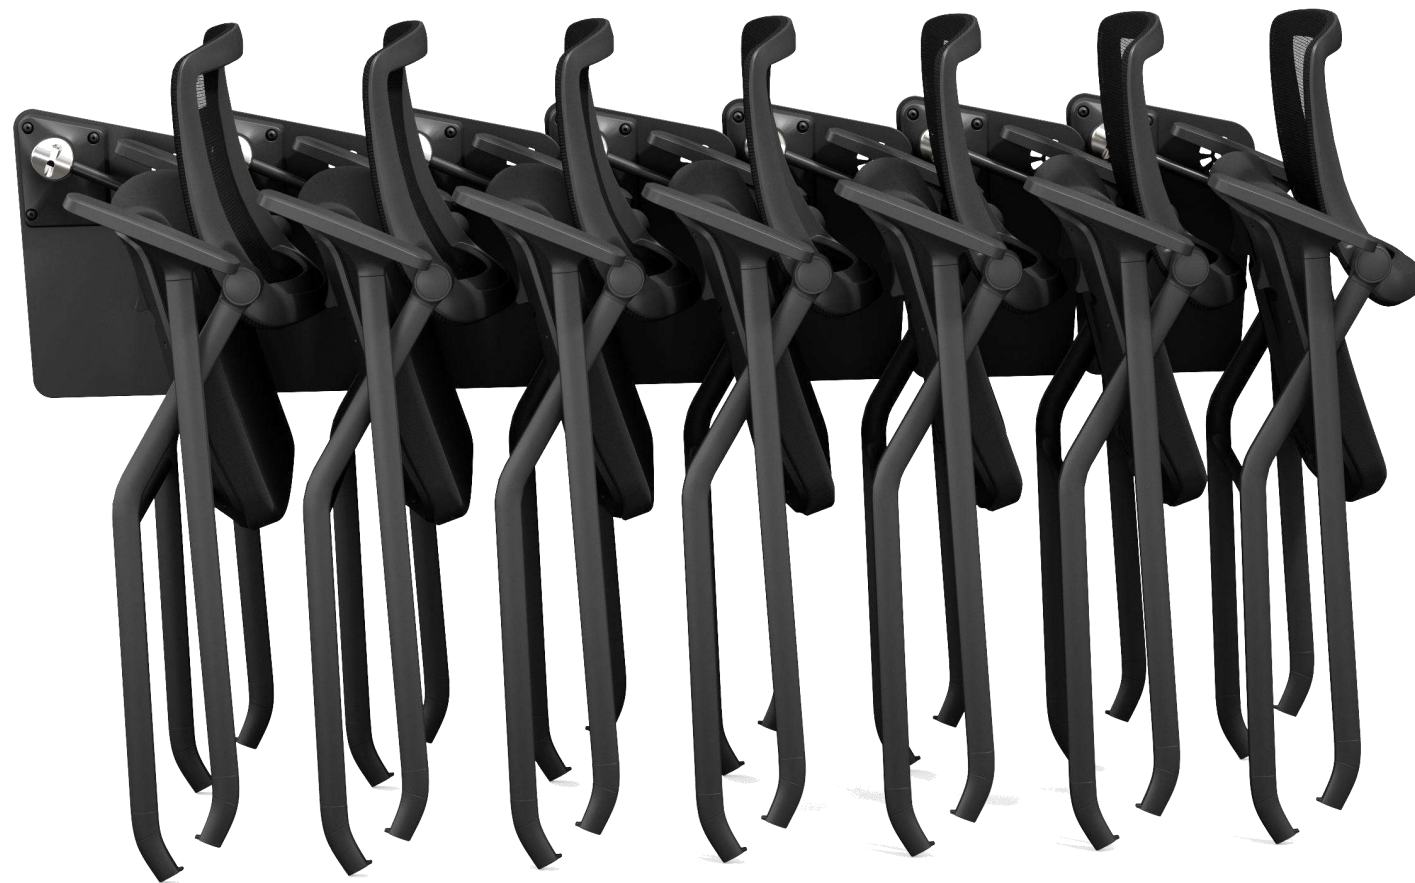

02

Folding function
